

Fund Overview

The Waypoint All Weather Alternative Fund is our core public equity portfolio that is designed to deliver superior risk-adjusted returns across market cycles. It is comprised of capital distributors and compounders with a volatility overlay to reduce the impact of market drawdowns.

The strategy provides institutional grade diversification via uncorrelated returns with low volatility & drawdown risk. Our portfolio management team has been managing the strategy for the past 10+ years in segregated accounts and now offer access through the fund with daily liquidity.

Fund Commentary

The Waypoint All Weather Alternative Fund was -1.58% for the month vs. +0.55% for the S&P TSX Total Return Index.

The start of the new year has been characterized by outperformance of large cap technology and underperformance of small cap equities. The portfolio was negatively impacted by weakness in two of its industrial positions (AirBoss of America -9.5% and MDA Ltd -3.0%).

Continued market strength will depend on whether policy makers can successfully execute a soft landing. Hopes for rate cuts are being undermined by strong Q4 GDP, robust jobs data and record high stock prices. We believe history is the best guide to understanding probable outcomes and note that only one time in eight has the Fed started an easing cycle without triggering a recession. When a recession starts, the Fed accelerates the easing cycle. The stock market always corrects during a recession.

We thank you for your on-going support.
