Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risk.

This mutual fund is an alternative mutual fund. It is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate this Fund from other types of mutual funds include: an options overlay strategy which involves the increased use of derivatives for non-hedging purposes; and the ability to borrow cash to use for investment purposes. While these strategies will be used in accordance with the Fund’s investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.

What does the Fund invest in?

The Fund seeks to provide investors with attractive risk-adjusted investment returns over the long term by investing in, or obtaining exposure to, issuers that Waypoint Investment Partners Inc. believes are not typically included in institutional investment mandates. The Fund will use an alternative investment strategy utilizing options to seek to manage market volatility and reduce downside risk associated with general market declines of the Fund’s equity portfolio. The Fund’s aggregate gross exposure to cash borrowing and derivatives used for leverage must not exceed 300% of the Fund’s net asset value, which is measured on a daily basis.

How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Waypoint Investment Partners Inc. has rated this Fund's risk as **Low-to-Medium**.

Generally, the rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the "What are the risks of investing in the Fund?" section of the Fund's simplified prospectus.

No guarantees

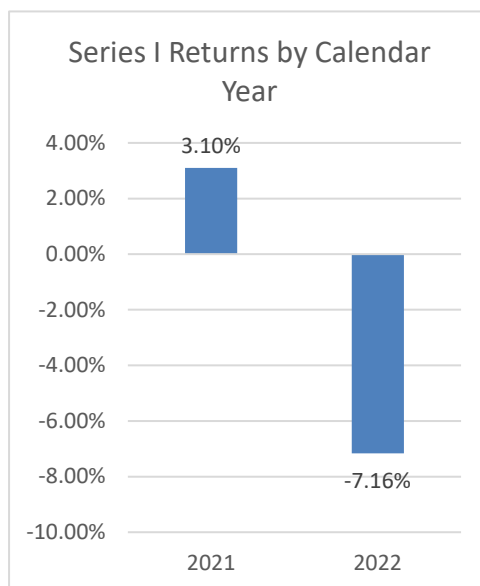

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

How has the Fund performed?

This section tells you how the Series I units of the Fund have performed over the past two calendar years. Returns are after expenses have been deducted. These expenses reduce the Fund's returns.

Year-by-year returns

This chart shows how Series I units of the Fund performed in the past two calendar years. The Series I units dropped in value in one of the two calendar years. The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the Fund will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for the Series I units of the Fund in a 3-month period over the past two calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	8.0%	April 30, 2021	Your investment would rise to \$1,080.
Worst return	(7.2)%	October 31, 2022	Your investment would drop to \$928.

Average return

As of July 31, 2023, the annual compounded return of Series I units of the Fund was 1.17% since its inception. If you had invested \$1,000 in Series I units of the Fund since its inception, your investment would now be worth \$1,012.
