**Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risk.**

**This mutual fund is an alternative mutual fund. It is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate this Fund from other types of mutual funds include: increased use of derivatives for hedging and non-hedging purposes; and the ability to borrow cash to use for investment purposes. ### How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

Waypoint Investment Partners Inc. has rated this Fund’s risk as **Low-to-Medium**.

Because this is a new fund, the risk rating is only an estimate by Waypoint Investment Partners Inc. Generally, the rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the “*What are the risks of investing in the Fund?*” section of the Fund’s simplified prospectus.

**No guarantees**

Like most mutual funds, this Fund doesn’t have any guarantees. You may not get back the amount of money you invest.
